PREFACE

Jacques Marquette and Louis Joliet passing down the Mississippi River in 1673 were the first white men to see the present site of Quincy. Permanent settlers, however, did not appear until 1820 and other pioneers followed slowly. At the county's formation five years later it contained merely seventy inhabitants. But this figure grew rapidly during the next decade which brought so many immigrants into the Middle West. These people who entered the country between 1820-1840 came from every American State. The original European ancestry was varied. It included in a descending order persons of British (English, Scotch-Irish or Ulster, Scotch), German, Dutch, French (Huguenot), Celtic Irish and Scandinavian descent. Subsequent foreign immigration, probably reaching its peak before 1870, increased the German and Celtic Irish proportions; raising the former to first and the latter to second or third place on the list. Excepting a few freed or escaped slaves, Negroes arrived after the Civil War. Their number has remained about two thousand. Greeks, Italians and Jews scarcely exceed the hundred mark, are new-comers, and have not been approached for folk-lore.* The essential composition of the population has changed little within the last sixty or seventy years.

Bestowing an Old World origin upon each folk-lore item would be an impossible task. Some of the ordinary beliefs, like horseshoes, pins and weather-lore, constitute common property; while others, baseball and craps for instance, are indigenous to the United States. It is possible, notwithstanding, to label much of the material; but this has been done only with hoodoo and witchcraft sayings.

An attempt was made to secure real experiences or stories rather than bald statements and, excluding phonetic spelling, those obtained have been recorded literally without corrections. Quotation marks enclose this material. Omission of Negro dialect means that colored folk speak the same language as their white neighbors. They do possess, nevertheless, a small vocabulary peculiar to themselves and examples frequently occur in the text. Even so, such terms are not known by all Negroes. Occasionally an informant has written his contribution. These will be so indicated.

* Two or three items given as Jewish were also known to several non-Jewish informants. Lore definitely Jewish was excluded. The same is true of the three or four Indian sayings.

The principles observed in field work have been two, knowing people intimately and interviewing them personally. To describe this unceasing process, of establishing contacts, acquiring credentials from one person to another, and solving problems generally, is beyond either the purpose or the compass of a preface.

At least ninety-five percent of the present collection was gathered within the ten square miles comprising Quincy and its immediate environs. Considering these narrow geographical limits, the nature of some of the items collected—the author would be ungracious towards his native land and unfair to the reader's perspective, if he failed to say that Adams County is not a benighted community.

To the hundreds of individuals whose friendliness and co-operation have been prerequisites for this volume, I offer grateful acknowledgments. The Trustees of the Alma Egan Hyatt Foundation must be thanked, not only for the opportunity of publication, but also because they have permitted absences from official duties during the last two years so that a work previously begun might be concluded. In actual collecting I am indebted to my niece, Mrs. John Andrew Leventis; and particularly to my sister, Mrs. Minnie Hyatt Small who laboring with me and separately has rendered inestimable assistance.

But on my way home, one and a half blocks from my home, I was hit square in the middle of my Hudson roadster by a drunken dentist of Quincy. Wrecked my car. Set my companion clear across the street with a torn chest and minor bruises. Completely wrecked the dentist's car. And to cap the climax, when I took same into court, the dentist had

2436. As a child I occasionally saw on the streets of Quincy a girl heavily veiled and attended by a nurse. Naturally she was disfigured in some manner, but in what way, the tales told varied considerably. Some people said the mother had been frightened by a bull and consequently the girl's face bore an image of that animal, while others believed her to have been marked with a flaming red hand. — Since writing the preceding, what is probably a truer version of the story has been discovered. The information comes from a woman whose mother lived next door to the family. This household, a very large one, kept a herd of cows in an adjoining pasture, and retained only one maid to do all the work. In these many domestic tasks the mistress of the house refused to assist, but instead, she would sit all day at the window watching the cows. Her daughter was born with a "cow's head," an elongated face and large pointed ears like those of a cow's. The girl's birthmark according to popular belief was a punishment from God, because the mother had sat admiring the cows and had failed to help an over-worked servant.

She became frightened and began to run, at the same time calling her husband working in a nearby field. This girl, now a woman, has always been compelled to shave the hair from her birthmark.

Each child possessed a clubfoot, and the girl's fingers were gnarled and stiff, faintly suggestive of a turtle's claw. Moreover, her head sank down between her shoulders somewhat in the fashion of a turtle's. On inquiry I learned that Grandma knew how to 'talk over' people who were afflicted with wounds or sores and made them well, and that she frequently exercised her art for all sorts of people. She had

'talked over' Marie herself, but Marie declined regretfully but firmly to tell what she said. 'You dassunt tell or something bad will happen.' The school janitor to whom all the secrets of the 'South End' are an open book, told me that he knew several old women who pretended to this skill, and he mentioned one within two blocks of the school, a radius that would include Grandma also. I mentioned Grandma's curious practice to Mr. B., pastor of K. Church. He received the tale without any surprise and acknowledged that the thing was common. Walter asked several acquaintances of German parentage what they knew about it, and he found that old women who will 'talk over' you can be found in northeast Quincy as well as in south Quincy. HEARTS

Ace — is your home

We will say the ninth card is the ace of diamonds; the next nine (*counted*), ten of diamonds; the next nine, king of spades; the next nine, ten of clubs; the next nine, eight of hearts; the next nine, nine of clubs; the next nine, king of diamonds; the next nine, three of diamonds; the next nine, knave of diamonds; the next nine, ace

of hearts; the next nine, nine of spades; the next nine, six of spades.

That would read I was going to get a letter, with a large amount of money, from a dark man, to take a trip on, to a big city, and would have a good time, maybe I would get work, with a fair man, for small money; would get a message, from home, telling of sickness, then death would follow.

Three — loss of property
Deuce — always signifies a coffin, but whom it is for depends on the other cards that are near.

9056. "Pour the grounds of coffee in a white cup, shake them well, so that the grounds may cover the whole cup. Make a wish, then turn it over into the saucer. Then try and pick out the figures that formed.

If you find one tree, it is good health.

If you see several trees in your cup, your wish will come true.

If the bottom of the cup is clear, no trouble for you. Dark grounds denote trouble.

A single large ground on the edge of the cup is a letter bringing good news.

A cluster of grounds on the side of the cup is unexpected money coming from a death.

A clear way from the edge of the cup to the bottom, your way is clear and no trouble for you.

A bunch of dark grounds on the side of the cup like birds brings you bad news.

If a cross forms in your cup, great trouble and maybe death.

A ring in the cup is always marriage, and if a letter can be discovered near it, that will be the initial of your future wife or husband.

If a clover leaf is at the top of the cup, it is a good sign; at the bottom, not good.

If you see an anchor at the bottom of the cup, success in business; at the top, you are going to fall in love.

If you see a snake, it is always an enemy.

If you see a dog's head on the top, you have true friends; if at the bottom, enemies.

If you see the figure of a man, you will have a speedy visitor.

If a crown is in your cup, you will get a large fortune.

If you see a heart surrounded by dots of grounds, you will recover some lost money.

If you see a coffin, it is a sure sign of death."

9057. "Take three dice. Shake them well with your left hand and throw them out on a table, where you have drawn a circle with chalk. If in throwing out the dice:

If one remains on the top of the other dice, it is bad luck for you. You had better take care.

If the same number comes twice at a trial, you will get news from abroad.

If a number rolls over the circle, that number does not count.

If one rolls on the floor, very bad luck.

Never shake the dice over three times at a trial. If you do, it will not come true. You are just losing time.

What the dice mean:

Three — a very pleasing surprise.

Four — you will have a quarrel.

Five — you will meet a funeral.

Six — you will lose your property.

Seven — someone will talk about you or you will hear a scandal.

Eight — someone will propose to you.

Nine — you will go to a wedding, maybe your own.

Ten — you will go to a christening of a baby.

Eleven — a death that concerns you.

Twelve — you will get a letter.

Thirteen — tears and very bad luck.

Fourteen — you have a secret enemy; beware they don't get you in trouble.

Fifteen — prosperity and happiness will come to you.

Sixteen — you will take a pleasant journey.

Seventeen — you will go on the water.

Eighteen — you will rise up in life and get a good job."

10238. "Never let a clock run after someone dies. Stop it as soon as they die and don't let it run until after the funeral. Then when you start it again, don't let it run from the time you stop it, like if you stopped it at nine don't start it again at nine, start it at ten or eleven, any time, just so it is not on the time you stop it. If you don't, you will have another death right away."

My mother went to the door. My little brother nine years old was out in the yard. My mother said, 'What did you do to make such a noise?' He didn't even hear it. The woman sitting by the door said, 'Too bad, but I know there will be another die before the year is out.' And sure enough, my brother that was out in the yard died before the year was out."

"The Irish always cover a looking-glass when there is a death in the house, to keep the soul from seeing itself in the looking-glass." *This practice is not confined to the Irish and it seems to be somewhat common. In addition to a number of examples known to me, one a funeral recently attended by my sister, Mr. Z., an undertaker, said that he frequently encountered the usage in negro homes. Strange to relate, he did not know the reason for this superstition (or for that matter, anything about death-lore); and had never asked, fearing he might give offense.*

"If someone gets drowned, take the last dirty shirt they took off and spread it out over the water, and it will float to where they went down; then it will whirl around several times and go right down through the water, and you will find the body by the shirt." The same method was explained by another person. This is a splendid example of the unreliability of eyewitnesses, especially when these witnesses were expecting something unusual. It should be remembered that a coffin is not lowered into an empty grave, but into a wooden container, hence, the width and length of a grave are much larger than the coffin. Another witness, however, said that it was only the lowering apparatus which refused to work. This was probably the case. A third witness said, the reason the coffin could not be lowered, was that J. "didn't want to go."*

Then I heard tramping and tramping through the house from the front door to the back door. Then I woke my husband and told him. He said I was asleep. I said, 'How can I talk to you and be asleep?' I said, 'I want you to get up and look in that closet' — for I could see something standing there, and I wanted him to pass by (*between her and the closet*) and break the spell. Her husband died five years ago, and she sets the table for him every time she eats and puts a chair for him, and he always comes and eats with her and talks to her through the meal."

So after the gipsy didn't tell her a thing about her wedding day and she was to be married that week, she went out to this old well in the field, took the stone off and look down. And instead of seeing water she saw a cemetery with an open grave and a coffin by the grave. She started to running and screaming, and going through the orchard she fell down and fainted. And they did come at dark with the melon, just like the old man said."

So this woman came at once to me — I was only living about a block from the party — to see if I could tell her anything. I told her what I saw — to go right back and look on that sick boy, and she would find a five dollar bill, a dollar bill, a half dollar, a quarter, and a dime; making six dollars and eighty-five cents — she went right back and they found the purse and money in this sick boy's trouser leg."

I told her no, that she would find him only three doors from her home with another woman. And the police found him there and arrested him and the woman."
10400. "One day a friend of mine came and wanted to know if he would rent his garage. I told him that a small dark man was figuring on it now, but he would go away; and in a few days a sandy complexion man of stout build would come, and he would rent it to him, and he did."

SPIRITS AND GHOSTS

10401. On Christmas Eve the spirits walk.
10402. "A very old saying is, if a child stay out late at night, the student doctor would get them and cut them up." *Negro*.
10403. It is believed by some people that the spirits of the dead return to earth as animals.
10404. Sometimes the spirit of a dead person will leave the dying body in the form of an animal. — "I went with another woman one night to sit up with a very sick man, and just as we started up

the steps, a big black cat jump down in front of us. I said, 'What was that?' She said, 'It was his spirit.' And that man died that night."

10405. The person who buries an animal alive will be haunted by its spirit.

10406. Occasionally the spirit of a dead animal will return in its own form, as a black cat did in the following example: "One time when this lady was a baby, they moved into a big house. That night when her father was gone, the mother was reading, when she heard a human shriek, and then she heard three knocks on the old dresser. The next day a beautiful cat came out of the cellar. The cat went straight to the baby and began to play. Whenever the mother wasn't looking, the baby began to cry. She didn't know what made it do that. When the father came home they went upstairs to look at a room that had once been a baby room. They saw a very pretty rug. They began to wonder why anybody would leave a rug in a house when they moved. The father lifted the rug and saw that much blood stained the floor. They tried to scrub it up, but it could not be taken out of the floor. The mother went to the store and told the man about it. He said that a beautiful baby had been murdered in that room and that every night the blood would cry out. He told her the baby once had a black cat but it had died in the cellar. He told her not to let the black cat get near the baby because it would try to choke the baby. She went home in a hurry and found the cat trying to get at the baby's neck and the baby was crying. She found out that the cat had tried to choke it whenever she wasn't looking. They moved away the next day and the woman that was that baby is still living. She isn't over twenty-six years old."

when the horse would skit all the way over." — *See number 10455.*

10414. Years ago Mr. J. was driving along a country road about dusk and his horse suddenly shied. Looking forward to discover what had frightened the animal, he saw his brother standing in the road. This seemed rather unusual to Mr. J., since the brother lived in a distant community; but thinking his brother had made an unannounced visit and was merely walking down the road to meet him, he called out to the brother. Then the apparition vanished. Some hours later Mr. J. learned that his brother had died about the time he thought he had seen him in the road.

10443. "I was working in Jacksonville (*Illinois*) on the street lights. I had another colored man helping me. 10445. "When I was nine years old, one night just at dusk I went to

the spring to get a bucket of water. On my way back I met my father coming down the path. Thinking that he had come to help me carry the water, I started to reach him the bucket. He did not take it. I watched him. He went right by me and straight on to the cemetery. I knew then that he was going there to pick out his grave. When I got to the house he was sitting in the kitchen by the stove. I looked so funny, mother said, 'What is wrong?' I said, 'I just met father down the path.' Mother said, 'That was his spirit you saw, for he has not been out of this room.' And my father died that week."

10446. "This Mrs. P. certainly believes in seeing spirits. She told me the room we were in was just full of spirits, only I could not see them as she did, because she was born with a veil. — 'When I was a girl, the boys and girls did not like to walk with me to church, because I was always getting off the sidewalk to let some spirit pass by going to the cemetery'."

10450. If your mother dies, she will come back to see you every night for seven days.
10451. "A negro boy told me this. Ever so often the spirits of the dead in a family return in the form of someone, a stranger, asking aid. It may be an old man or woman who has died, returning as a beggar asking food or money. It may be a child begging, to sell something or to be given something. If you turn the person down, you are turning down the spirit of your departed dead. Probably a reason why negroes are so generous to beggars and agents." *Written contribution.*
10452. "About eight years ago I had a friend move into a large two-story house down on the bottom road going north by the ice house. It was haunted. There was a big spot of blood on the floor in one of the rooms, and they could not get it off the floor. No one could sleep in that room. The doors and windows would be open all the time. They would lock the door at night and when

they would get up, the door would be open, the windows would be open. So they only stayed a few weeks. No one would stay there a month."

10453. "There is an old house seven miles from Kinderhook (*Illinois*) that is haunted. No one will live in it any more. They give you cheap rent but people will not stay. I lived in it myself about fifteen years ago and you could always hear strange things. One night we went out to the barn to get wood to build a fire, and no one was in the house, and you could hear a noise like someone was moving chairs up to the table. About every other night you could hear blood drip and drip over in the corner where the dead bodies laid. You see, years ago a man was going with a girl in that house, and her folks would not let them marry. So one night this beau came to the house and killed the girl's mother, the girl and the dog, and threw them in that corner where you hear the blood dripping. Then he killed himself. They never could get the blood off the floor. They put a new floor over the blood but that didn't stop you from hearing that blood drip. Everyone that lives in that house can hear that blood dripping, and that is why no one will live there."

10454. "Years ago a young man was going with a girl for a long time, and they fell out. He said, 'I will never marry you.' The girl worried so over it that at last she killed herself. In no time this young man started to going with another girl. Every night when he would go to see this girl, on his way home down Vine Street he would meet the spirit of this dead girl right on the sidewalk. She would not let him pass. She made him stand there for a while, then the spirit would disappear and he would go home and worry. He could not sleep or eat. At last he went to see a priest out at Z. Church and told him about meeting the spirit every night. The priest told him, that night when the spirit stopped him, to call her by name and say, 'What is wrong that you can't rest in your grave?' He did. The spirit said, 'Pray for me, pray for me' — and disappeared. He went home and prayed all night. The next morning the man went and told the priest that this spirit said, 'Pray for me.' The priest said, 'I am going to hold five o'clock mass in the morning and see why that poor soul wants us to pray, and you pray for her every hour. The next morning the priest prayed so hard at mass he did not have a dry stitch on him, but he found out that this girl was to become a mother and that was why this spirit was stopping this man every night. She was worrying over killing her unborn child.'

10455. A story is also told about the old Kinderhook bridge (*see number 10413*) by a negro. Years ago he and his employer one night were driving a herd of cattle along the road that led to the bridge; he in front, leading, and the employer in the rear. Two miles before reaching the bridge: "My horse snorted and would not go on. I looked and there was a large black spot (*bloodstain*) on the road. I got off my horse and had to lead him around that spot. And just before we got to the bridge, I saw two men standing on the bridge in white shirts; and when I got to the bridge, they were gone. I told my boss, George B., and he said not to be afraid, that happened all the time. Two men were killed right where that black spot is in the road." On another occasion this old negro was again driving cattle, and when he reached the bridge, he heard a noise like a gunshot (*the two men had been shot*), and a light flashed up from the bridge: "I was not afraid this time because my boss told me not to be."
10456. "When I was a girl I worked out. I was working in a big boarding house where we had lots of railroadmen and cattlemen. We had a large lumberyard about three block from us and they never could keep a night watchman. He would work one night, then give his place up. I didn't know what was wrong. One day several of our boarders were late for dinner and I was waiting on them, when one of the men said, 'Do you know the night watchman left last night again down to the lumberyard?' And one of the men said, 'What is wrong down there?' This man said, 'I will tell you, for I saw it myself. Every night between twelve o'clock and one o'clock a man comes all dressed in white with a long measuring stick, measuring lumber, and when the night watchman sees that ghost going around measuring lumber, he just leaves and you can't blame him.' The man said, 'What is wrong with you?' The other man said, 'Well, if you don't believe it, I will take you down about twelve-thirty to the lumberyard and show you the ghost, and you can see for yourself.' I stood and took in all they were saying. So one night real soon after that, at twelve-thirty they went to see the ghost. Sure enough, they saw the man all dressed in white going around measuring lumber. They talked so much about it around the boarding house, that the man that owned the place heard about it. And he went to the priest and told him he wanted him to go to the lumberyard at twelve-thirty and see what he could do about the ghost. So the priest went. He took two boys to carry two candles, and a boy to carry the cross. All four went out one night at twelve-thirty. The priest saw the ghost measuring

lumber. He went up to the ghost and said, 'What are you doing here? Can't you rest in peace?' The ghost said, 'I have been cheating the people on the measure of lumber.' The priest said, 'Are you willing to make that all right?' The ghost said, 'I am here to be relieved.' The priest said, 'Go in peace.' And the ghost left and they never did see him again in the lumberyard. The ghost was one of the firm that had died, and when he was living he cheated everyone he waited on." *This happened over fifty years ago when the narrator, an old German woman, lived in St. Louis, Missouri.*

10457. "One night I heard someone call, 'Molly, Molly.' I said, 'David, what do you want?' — thinking it was my brother in the next room. The voice said, 'It is not David. It is Will' — and said, 'Molly, those darkies are fighting over there.' It was my dead husband warning me not to go across the street."
10458. "Two weeks ago I was lying in bed and my mother came to the bed and said, 'I am tired, Jessie. I have come a long way to tell you to move, for if you don't, you are going to get into trouble.' And I took it for a token and moved the next day, for once before my dead daughter came and told me to do something, and I didn't do what the spirit told me to do and I got in trouble bad."
10459. "The same lady was almost dying on the operating table in Chicago, Illinois. Her relations were here in Quincy. Did not know it. That night the lady's mother woke up in the middle of the night and saw her daughter's ghost standing over her and it was weeping. The next day the mother told the lady's brothers and sisters that their sister had died because she had seen her ghost. They began to pack to go to Chicago, when they got a telegram saying that she was all right, because the doctor had given her a shot (*hypodermic*) at the last minute and saved her life." *Written contribution.*
10460. "Mrs. A's mother is close to eighty years old. She was telling a story when she was a young girl. They lived uptown in a flat and the rats were very bad, and one night the girls wanted to go to a dance but the mother told them they had to do their dishes before they went; but somehow they put the dishes in the sink and didn't do them. The old folks went to bed and the mother woke up about midnight to see if the girls had got home from the dance. But they hadn't got home yet, so she fell to sleep; and they heard the worst noise. It just shook the house, but they were afraid to go out and see what it was. It sounded like all of the dishes in the cupboard broke. And nine days afterwards they got word from Germany that his mother died the very night they heard

the terrible noise. They said (*reported from Germany*) her last words was this boy's name. And her spirit came to him when she died." *Written contribution.*

10461. "After Mrs. D. had gone to bed, she saw her daughter in a light-green dress come to her dresser. She called to her but she didn't answer, so she got up and went to her room, and she was asleep. The girl in the green dress came back the second week and the third week, but whenever she talked to her, she would disappear. Shortly after that they took her daughter to a hospital and she lay between life and death for three weeks. Mrs. D. said it was her dead sister that came back to warn them that the other girl would be very ill." *Written contribution.*
10462. "One day my father said to my mother, 'Did you see that yellow canary bird come in at the front door and go right through the house to the kitchen?' My mother and I did not see it. My father said, 'That was my son's spirit and I am going to follow it soon.' And my father died in two weeks."
10463. "I know a woman that has only been dead several months, and they had a party in the house last week. While the party was going on, the doors would open and shut all the time with no one near the doors. It broke the party up. They could not understand it. It was the dead woman coming back. I guess she didn't like it, having a party so soon after her dying."
10464. "A woman died and she had a beautiful scarf. She always said when she died she wanted that scarf put in the coffin, she did not want anyone to have it. When she died they did not put it in the coffin, and every night after she was buried she would come back. You could see a big black object going over the house every night. So they thought they would give this spirit the scarf. Someone said never to hand a spirit anything. So they put this scarf on a long pole, and when this spirit came that night, they held the pole out and the spirit took the scarf; and they never saw the spirit or scarf again."
10465. "A woman was mean to her mother. The mother said, 'When I die I will come back and haunt you, you will never sleep or rest.' When her mother died, she did come back. When the girl would go to bed at night she would hear chains rattle in the room. And the ghost would put the bedcovers off and even pull her hair. This girl could not sleep. She could not eat. The ghost would knock the table over with everything on it. She got the policeman and he could not find anything wrong. She got the policeman the second time and told him she could not rest. The police-

man said, 'Go walk the streets then.' She did. And at last she died over the ghost not letting her rest."

10466. "I know a man that his wife was sick, and he started to going with another girl. She called him to the bed one day and said she knew he would marry this other girl when she was gone, and if they didn't treat her two little girls right, she would come back. This woman died and he married the other girl in six weeks. Every night after they were married they would hear all the tinware in the kitchen fall on the floor. They would get up and when they got in the kitchen, everything was all right, but just as soon as they went back to bed they would hear all the things fall again. They could not sleep. This woman some way found out the dead woman was jealous of her so she left. The woman said she could not stand her coming back every night."

10467. "A brother and sister was living on Eight Street. One was living on one side of the road and the other was living on the other side. Their father died and made a will and wanted them to change houses, and they did not want to, so they kept on living in the same houses. So one night the old man came back with his big straw hat on and his cane. He walked up and down the road on Eight Street just like he did when he was living. He kept coming back every night and walking up and down the road, and everyone seeing him, that it worried the brother and sister, so they changed houses just like their father wanted; and the father stopped coming back."

10468. "About thirty years ago we worked on a farm. It was a large house of fifteen rooms. The man had died and his son didn't do like he wanted him to do. They said the house was haunted, and no one would stay over a week. We said we would try it, for we didn't think the house was haunted, but we found out it was. Every time it would rain, the doors and windows all over the house would open and shut and keep that up all the time it was raining. It scared us to death, but we were getting good money and we just stayed on. One night we heard someone at the kitchen door. It sounded like someone had an axe hitting on the door. My husband went to the door and when he got there the noise stopped, but just as soon as he sit down, the chopping at the door started again and kept up all night. One of the neighbors told us they didn't see how we could stay there with all that noise, but we stayed in that haunted house two years, always hearing that noise and scared almost to death. We saved every cent of our money and bought us a little place and got out of that haunted house."

10469. "Years ago a girl was lying in bed and she said she felt a breeze over her. It was a ghost or something, for it told her that if she would start digging down in the cellar, she would come to a pile of old papers, then to keep on digging and she would come to a can, then open it up and she would find lots of money. So she went down in the cellar and started to digging. She came to the papers just like the ghost or whatever it was told her, but she got afraid before she got to the money and gave it up." — *The old Irishwoman who told the story was the girl.*
10470. "When I was seventeen years old I was living in a haunted house. It had a large basement with two rooms. Every night at twelve o'clock someone would unlock the door down in the cellar and come upstairs into the kitchen, go out the back door, and that was locked, and come right back in the house and through my bedroom, and go to the front room and disappear. I would not hear anything until the next night at twelve o'clock. They kept this up for a month. One night this ghost came to my bed and said, 'Do not be afraid, I will not hurt you.' They told me to go to the small room in the cellar and to move three planks, and dig down until I found black dirt, and under that dirt I would find some tin cans and broken dishes, and under that a pot of money; that the silver was there, but the greenbacks had decayed. I went down the next day and started to dig. I propped the door open to the room, but it would not stay open. Every time I would open it, it would close up. I kept on digging, but every time I put the shovel in the dirt I got cold, and the more I would dig the cooler I would get. I found everything the way the ghost said, the black dirt, then the cans and broken dishes. But I was getting so cold. I left before I got to the money. I tried to get my boy friend to dig for the money, but he would not, because he said, 'If a ghost tells you about money and you go and tell someone else and they dig and find it, they will die.' He said he did not want to die. So I had to let the money stay there." *Negro.*
10471. "One day I met a man on the street and he said, 'Bill, I want you to go home with me, I am afraid. I see my mother every night in the room. So I went home with him. And that night when she appear, I told him that she wanted to tell him that she had hid some money in an old boot in the wagon shed, and didn't want anyone else to have it but him. So we looked in the shed and we found it there, just like I told him; and she did not appear to him any more after he got the money.'"
10472. "About forty years ago some people moved into a house up on

the bottom road, and one day the woman found a chart in that house that told where some money was buried, on up the road back over an old fence. This chart also told it was for a certain person, and for no one to try and get it but the right person, for they could not have it. I knew this woman. She was large and not afraid of nothing. So one moonlight night she went up to get the money. When she got to the fence where the chart told about it, she started climbing over the fence; and when she was halfway over, something slapped her face and she fell back over the fence. She could not see a thing, so she tried climbing over the fence again; and the thing slap her back again. She tried three times, then gave it up, for the dead spirit was not going to let anyone have that money but the right one."

10473. "My grandmother was always saying someone tried to wake her every night. They would come and shake her and tell her to go up in the attic and look in a book and she would find some money. So one night she went with the person to the attic and found the money. Then the person said to my grandmother, 'Go down by the cow shed and I will show you where to dig and you will find something else.' But my grandmother was too frightened to go that night. She put the money in a tin box on the table. When she got up the next morning she opened the box and the money was gone. That night the person came again and told her to do the same thing. So she went to the attic again and found the money. Then she followed this person to the cow shed and dug down and found the half of a man's arm. She was so frightened she dropped the arm and ran into the house. The next day they put the arm in the cemetery, and that person never returned again. The arm belonged to grandmother's murdered brother, and the money was in the book in the attic."

10474. "Years ago a man and wife and child were traveling. They were tired out and happened to stop at an old empty log house near Kington (*near Liberty*). The man said to his wife, 'We will camp here for several days. Maybe I can get some work.' The man unhitched the horses, and said, 'I will go down here and see if I can find a spring for water and water the horses.' The woman and child went in the house to see what they could find. The man at the spring heard his wife screaming and hurried back to see what was wrong. She said, 'This house is haunted. Just as soon as we got in the house an old man with a cane came in the door and kept walking around us, then went out the door.' Her husband said, 'You just imagined it.' After they had some lunch, her husband said, 'I am going up here to this next farm-

house and see if I can get some work.' The man told this farmer he would like work and he was down in that old house. The farmer said, 'That is my house. If you will stay five years, I will deed you the house, but no one stays over a night.' The man said he was not afraid of ghosts. And the farmer told him to come up in the morning to work if he still wanted to stay. While the man was gone this old man came again and walked all around this woman and pointed his cane at her. She started to howling. The old man said, 'Do not be afraid. I will not harm you' — and went out the door. When her husband came she said, 'Lets go. This house is haunted. I will not stay.' Her husband knew it was, but he would not tell her; only said, 'You are seeing things' — and would not go. The next morning this man went to work. After he was gone, in came the old man again and walked all around this woman and pointed his cane at her. She started to howling again, and he said, 'Lady, I will not hurt you. I am back here for a reason. I have come to do you good. My wife and I were murdered here for our money. Only, they did not get it. I want you and your husband to do two things for me. We are buried out here in a cave. I want you to take us up and bury us on the hill in the graveyard and mark the place.' Then this ghost took this woman in the cellar, took his cane and made a mark on the ground where some money was. Then he took her to the southeast corner of the house on the outside and said, 'Tell your husband to dig there.' He made another mark with his cane. 'He will find a box of money and the deed to this house. This house is mine. It is yours if you do what I tell you. Do you see that cave over there? That is where we are buried.' Then the ghost disappeared. The woman went back to the cellar to see if she could find anything and she dug up an old pitcher full of money. She sit it on the shelf. When her husband came home from work she said, 'I have made more money than you today.' He did not know what to think, his wife talking like that, when he knew she had not been out of the house. Then she told him all about the old man coming again. He went right outside and starting to digging, dug up the box with the money and the deed. The next morning he went to the cave and dug up the bones, got a nice box and put the old couple's bones in it and buried them up on the hill in the graveyard. The house was theirs, and the ghost did not come back."

10475. "An old man and his wife years ago came to a farmhouse out in the country and wanted to stay in the old hut next to this farm. The farmer said, 'If you can stay there, I will not make you pay

any rent. The house is haunted. No one will stay overnight. A man and his wife were killed there.' The man said, 'I am not afraid.' So they took the hut. Every night they would just hear everything, but they stayed. One evening when the man was gone and the woman was alone, in came an old man walking all bent over with long white whiskers and carrying a cane. He said to this woman, 'This is my house. I am buried out here in that old cave by the door. If you will bury me right, I will give you all I have.' He told her the deed to the house was in the cellar and some money, that someone had killed him and his wife for their money and deed, but did not find them. When her husband came home she told him what the old man told her. They went to the cellar and found the old man's bones and buried them. They were not poor any more. They had the deed to the house and money. The house was not haunted after that, or did they hear any more noise." — *This is a shorter version of the story given in the preceding item, but from a different source.*

10476. "About eighty years ago a man wanted to get rid of his wife, so he heard of a haunted house out here in the country about twelve miles from Quincy, so he went and rented it, thinking when she would see the ghost, she would be afraid and not stay, for no one would stay in that house over a night. This man did not tell his wife about the ghost, just thought she could find it out. They moved in one afternoon and the next morning when this woman went to sweeping the kitchen, an old man was sitting in a chair by the fireplace. This woman did not say a word. The next morning when she went to sweeping, the old man in the chair was by the fireplace again. This woman did not tell her husband that she had seen a ghost. But the third morning she asked the old man what he wanted, and the ghost said, 'You are the first person that has ever asked me what I wanted. I will tell you what I want' — and took her to a tree in the pasture; and he pointed at the ground and said, 'You will find something there, if you dig.' This woman started to digging and found eight hundred dollars. Then she went to the house and called her husband and said, 'You brought me out here to this haunted house, thinking I would be afraid and leave, but the ghost took me to where the money was. I have the money now, so you get out. I am going to stay'."

10477. "Years ago up on Honey Creek out in the woods near Mendon an old woman died. She had some money and she had it buried in the cellar. This old woman died before she told anyone where the money was. People would go there to live and dig for the

money. Just as soon as they would start to digging, they would hear chains rattling on the stairs and hear moaning and crying in the house. No one would stay over a night. And when everyone would go out the yard, three white sheep would go over the fence ahead of them and go down the road without any heads on. At last one old man said he was not afraid, he would go and dig for money. He stayed several nights trying to dig for the money, then hung himself on the stairs. He could not stand the noise he heard, that crying and moaning and the noise on the stairs. After that they took the house down."

10478. "We lived in a house on Madison Street, and when I went to bed at night, I would lay there and couldn't go to sleep. I could not move my hands and feet. And all at once the closet door opened and something came to the bed. My mother said whenever I saw anything to say, 'In the Name of the Lord what do you want?' I did this and they went back into the closet. Sometimes it would be a person and sometimes a bouquet of flowers. We had to move from this house. An old German lady said there was money buried under the closet and the person was coming back for it."

10479. "Seventy years ago when I was just a young girl, I was working for a woman. She had two children. This woman died and her sister came to live with us. Every night just at dusk we would hear three raps on the closet door right by the bed where this dead woman did sleep. After this lasted so long, it made the sister so nervous hearing these raps every night, she said she would have to move. The day we were moving, just about time for these raps to come, the boy who was about twelve years old said, 'I am going upstairs.' I said, 'What do you want upstairs? Everything is out up there.' He said, 'I want to go alone.' I tried to keep him from going but could not. I thought I would watch him and not let him know it. All at once those three raps came and this boy said, 'In the Name of the Father, Son and Holy Ghost, mother what do you want?' You see he knew it was his mother, and she told him to get a shovel and go and dig under the rosebush in the back yard until he came to an oven. Then go and get his uncle to help him get the oven out. And he done just what his mother's spirit told him to do. And the oven was just full of money. And that boy was very rich after that. We would of left all that money if the boy had not of talked to his dead mother."

10480. "Thirty-four years ago my brother and I were out looking for hidden treasure or money. My brother could always tell where

there was any kind of 'medal.' We had heard about some hidden money up on the bottom road back of an old brewery. Years ago there was an old gambling den up near there, and we heard about some gamblers put money there, so we went up to look for the money. My brother located near the spot, so we each lay down about six feet from where he located it, to wait. When you are waiting to dig up a hidden treasure there is something that will always come and stand right over the spot, and you must not speak or move until they go away, then start to digging right where they stood. Sometime it will come in the shape of a chicken, cat, dog or just anything. While we were lying there waiting for something to come, a big black snake as big as my arm and about six feet long came crawling down through the bushes and leaves. It made such a noise that my brother forgot and jump up and cursed the snake. He was afraid because it came so near him. That broke the spell, because the snake was coming to stand over the treasure; and you can't say a word while watching, so we had to go home without the money."

10481. "Eighteen years ago I was dressing my baby when the door started to open and shut real easy. I looked around and there was no wind or anything to make the door move, so I said, 'In the Name of the Father, Son and Holy Ghost, if you are a spirit and want to talk to me, go real hard' —— and the door started to open and shut real hard. After that I didn't know what to say to the ghost and it didn't bother me any more that day; but that night after I went to bed, something kept snoring at the head of my bed and I thought it was the spirit back, so I said again, 'In the Name of the Father, Son and Holy Ghost, what do you want?' This time it spoke to me and said, 'Go down in the cellar and dig between the gas pipes, four feet down, and you will find something.' The next morning my husband and I went down. He was carrying the lamp and I was to dig. I just got started to digging when the light went out, and my husband screamed and ran up the stairs. Up to this day he will not tell me what he saw on the bank of the cellar; but I never tried to dig any more. We moved because we found out the house was haunted over an old woman being murdered there."
10482. "If you should by accident see a light like that of a lamp, at midnight, it is a sure sign of hidden treasure there. Cover it with a board, 'In the Name of the Father, Son and Holy Ghost' —— and dig along the side of it to undermine it, and you will find it."
10483. "If you are digging for some money or hidden treasure in the

ground, you must not dig right down to it, you must dig a little from it and then come up under it; for if you dig right down to it, it will move away and disappear, and you will not find it."

10484. "If a person died and leaves some money buried some place, they will come back every night and day to see if it is still there; and if you try to dig it up, they will get angry at you and you will never find it."

10485. The person who finds hidden treasure by digging for it, will live only a year.

10486. The B. place is situated about seven miles from Quincy. A man working there some years ago, it being in the days before automobiles and good roads, was obliged to live with the family until he had completed his task. One night he was suddenly awakened. Someone, for he could feel the hands, had taken him by the feet and was slowly swinging them from side to side. He was too frightened to move. Then the hands were withdrawn and someone near his face, he could feel the breath, kept whispering unintelligible words into his ear. At last he found strength to jump out of bed and light the lamp. The person or thing had vanished. Sometime after this a younger brother of the man happened to sleep in the same room and he had the identical experience; and still later their sister was also a victim of the ghostly visitor. The owners of the house had never been bothered by a ghost, though the mistress upon several occasions when looking out of the window saw an old man standing in the door of the barn loft; but the apparition did not come near the house or attempt to communicate with its occupants in any manner. It was well-known in the neighborhood that years previously a former owner of the farm had been murdered by unknown hands, presumably for his money, since he had had a reputation for wealth. Neighbors thought that this money had been hidden on the farm and that the spirit of the dead man was trying to tell where it could be found.

10487. "Monday night I went to bed. I could not sleep and it seemed like someone was pulling and trying to pull me out of bed. I got so nervous I got up and looked under the bed to see if anyone was there. The next day I met an old German lady. I said, 'What is the sign, if someone is pulling you out of bed and you can't sleep?' She said someone was going to die and they wanted to ask forgiveness for something they done wrong to that person and could not die in peace."

10488. "Sixty years ago a girl killed herself in a house out in the country a few miles from Quincy, and after she was dead, she would

come back every night at twelve o'clock and walk up and down the stairs. You could hear her walking up the stairs plain. You could even see her hand on the banister, when she was coming up; and when she got to the top of the stairs the lights would all go out in that house, even if you were reading. This happened every night. They could not keep anyone in that house, so at last they tore it down."

10489. "Five miles below Quincy on an island there is an old haunted house. They say years ago a man killed a woman there, and this woman is always coming back. She will come to the house, then she will always go and stand in the barn door with her hands up just like she is going to fly, then she disappear; but every time this ghost comes, she turns out the horses and cows that are tied in this barn."
10490. "About twenty-eight years ago my husband was working on an island right above Quincy. They had a house on this place with two rooms down and one up. There were about ten men working there at the time, and they would watch for the ghost. They would lock the window, but they could see something raise the window, come right in and walk over them and go right out the other window. The men were just lying around on the floor, and just as soon as the ghost would go through the house, they would get up and go out and find all of their horses loose and out of the barn. They tried to catch the ghost but could not, but they would see it all the time."
10491. "If you find your bed all torn up when you come home, and there is no one in the house, then a ghost has been there."
10492. "There was a boy who drove his sister from home, then she died. Two days after that he took sick, and someone tore his sheets and tied him; and when they fixed him something to eat, something spit in it and he could not eat. On the fifth day he died."
10493. "Years ago a man killed his sweetheart in a house on south Twenty-fourth Street. After that the house was haunted. No one could sleep in that house after that. Someone would always pull the bedcovers off the bed. At last they had to tear it down."
10494. "She said her uncle had been dared to sleep all night in a haunted house on Twenty-fourth Street. That night he arose to see where a queer moaning sound was coming from. When he came back, the bed was placed at the bottom of the stairs and the bedclothes were still upstairs. He carried the cot upstairs again and slept at the top of the stairs. As soon as he would fall asleep, the covers

would be pulled from him and thrown downstairs. The next morning he ran home as fast as he could."

10495. "Forty years ago a house on the corner of Twentieth and Vine was haunted. A woman lived there they say that would keep babies that belong to girls that were not married. They say that a baby was murdered in that house and buried in the cellar. After that anyone in a certain room could not keep any bedclothes on. Two boys were sleeping up there and each one would say the other was pulling the bedclothes off the bed. Then they found out it was ghosts and they moved. They could not keep anyone in that house after that and at last they had to tear the house down."
10496. "Our house was haunted. Someone would pull the cover off the bed every night. We could not keep a cover on us at night. At twelve o'clock every night the dishes would start to rattle and keep it up until morning. No one could sleep in the house. So my father went to see a priest. We didn't belong to his church but someone told my father a priest could help us. So he went. And the priest told my father to get a peck of mustard seeds and throw it in all the corners of the rooms and leave it there and the ghost would not come back. So father got the peck of mustard seeds and put them all over the house. And we never heard the ghosts any more and could sleep after that fine."
10497. "Another thing that happen in that house was we never could keep any bedclothes on the bed. Something would pull them off. And we had double doors in that house and my mother would lock them at night, and when we got up in the morning they would be standing open. One night she nailed it up and the ghost took the nails out and the doors were open the next morning." *Not the same house as in the preceeding item.*
10498. The S. farm is a certain number of miles in a particular direction from Plainville. The family formerly living there had two daughters, grown but unmarried. These girls were in an advanced stage of tuberculosis. Realizing the seriousness of their condition and the possibility of approaching death, they said that if there was any way for them to return from the grave, they would. Both died within a short time of each other. The evening after the burial of the second girl, the three brothers were sleeping upstairs and the mother downstairs, the house was severely shaken and filled with a loud roaring noise. The mother called up to her sons and asked what they were doing, but they were as frightened as she. There were no neighbors closer than a half mile, and when questioned in the morning they affirmed

that nothing unusual had happened in or near their homes. Later, the family did not deny that in one room of the house, presumably the room of the dead girls, the person sleeping in it was unable to keep the bedclothes over him. As fast as the bedclothes were pulled up, they were jerked off by an invisible force. The house still stands but is uninhabited.

10499. "Two brothers were living in a house. It belonged to one. They had a fuss one day and he (*the owner*) told his brother to leave, to never come back on the place with his family again for anything. Time went on and this brother that owned the house died and the other brother went back with his family. Just as soon as his wife would clean the house up and they would go out in the other side, this spirit of the dead brother would come and dirty it all up. They could not keep the house clean. They had a little boy and when he would go to bed at night he would lay his clothes by the bed and the next morning they would find them in the barn loft. They could not keep anything in place. Even when his wife would make pies and leave them on the table and leave the room, when she would come back she would find the pies in the coal bucket and the pie pans all bent up. My aunt was there one day spending the day. She went to see if she could see the spirit. And this is true. She put her hat in the parlor, and they were out in the other room, and here came my aunt's hat right out the door by itself with all the trimming off. My aunt left after that. She didn't stay to spend the day or see the spirit. After that the spirit wrote on a slate to his brother, 'If you don't move I will kill you.' So the brother got out."

10500. "The grandmother of my friend Emma had been all her long life it seems a woman of violent and uncontrolled temper, though I never saw her except as a quiet, rather friendly old woman. She was past ninety when Emma told me that her rages which had been very hard to bear by Emma's cousin Bertha who lived with her, had met with a curious check. Bertha reported that latterly when the old lady broke out in fury the vases would leap from the mantel shelf, pictures would fall from the walls, or the like, and grandmother would become as meek as anyone could desire. Emma had perfect confidence in Bertha's honesty in the belief that these things happened, but for herself she needed the evidence of her own senses. What occurred in her presence she described to me within an hour or so of its happening, for she came to see me on her way home from her grandmother's house. She was sitting alone with the old lady, giving poor Bertha a much needed respite. Some chance remark set grandmother off

into an explosion of rage. Immediately, at the window behind Emma came a vigorous, authoritative thump, the sound of a blow that might have been expected to break the glass. Grandmother subsided into silence. Emma was at the window within a second, but there was no one there. The house stood a very narrow space from the next one, which presented a windowless wall. There was not room for an intruder." *Written contribution.*

10501. Some years ago there was a house near Eleventh and Broadway in which one could hear periodically a rapping sound as if a person were pounding the outside walls and this occurred even during the day. Careful watch both inside and outside the house, when the rapping happened to be audible, did not reveal any human agency. As it became impossible to keep or to secure tenants, the owner went to Z. Church and obtained a priest who exorcised the house. After exorcism, the rapping noise was never heard again.
10502. "My husband and his first wife were living in a haunted house out near Plainville. The first night just after they went to bed, they heard a noise in the cellar. It sounded like tin cans were falling down. They got up and went in the cellar but they had no cans and could not find out what it was. The next night they heard the cans again. This time the man got his gun and went around the house but could not find anything. And every night just after they would go to bed they would hear this same noise like cans falling. So they had to move to get away from the ghosts."
10503. "A white woman and her husband had a little home. One day her husband died and it was no time until she married a colored man. After she was married her dead husband's spirit came every night and knock the stovepipe down in the kitchen and all the pans off the stove. At last she had to give up her home. She got tired of putting up the stovepipe every morning. And just as soon as she moved to another house the spirit did not bother her."
10504. "Thirty years ago I had two stepchildren. We could always hear a noise on the door. It would sound like someone would take a whip and hit the door first one way then the other. Every time we would hear that noise the children would be scared to death. One day I went to the store and when I got back the children were in a corner trembling. They said that while I was gone someone came to the door and whipped and whipped and the door cracked and the whole wall shook. I said to my husband, 'This house is haunted. We are going to move. I don't want these

children scared to death.' My husband did not believe the house was haunted. We moved thinking we could get away from the noise. The spirit follow us to the new house. We kept on hearing the whipping on the door. One night my husband was lying back in a chair. He jump up and said, 'Why are you pulling my toes and nose for?' No one was near him. It was a spirit wanting to tell us our boy eleven years old was going to die, for he drowned right after that. And we did not hear any more whipping on the door."

10505. "The first night we moved in that house on Seventh between Maine and Jersey, when we were eating supper, a big light came on the side of the wall. It looked like a big plate. It rolled and rolled over the wall, then drop down in the sink. It made such a noise. It sounded like shooting upstairs. Then right after that shooting we could hear moaning and crying. Then it sounded like someone was dragging someone down the stairs. There was an old well in the yard and it sounded like they would throw something in the well. You could hear the water splash. We were afraid that night, but we got used to hearing that dragging down the stairs every night and throwing something in the well. My mother would lock the back door, but every morning it would be open, where they would go through to that well."

10506. About forty years ago a deserted house between Sixth and Seventh on Madison Street in Quincy stood back from the street and faced the alley. Many people considered the house as a haunted one. Every night between eleven and twelve o'clock all the windows and doors of this house would fly open and then close. Eventually, someone heard a voice in or near the house, saying, 'Look in the cistern.' Neighbors investigated at once and found the body of a man, which on identification proved to be the remains of the former occupant of the house, who had been missing for several years. After the burial of the corpse, the opening and closing of the doors and windows stopped.

10507. "On the old covered bridge, now torn down, was often seen a ghost stalking to and fro. Now and then there was heard groans, as from one grasping for breath. It has been discovered that in 1857 a man was set upon by two men, robbed and hanged near the bridge. The body was found by early settlers and buried. The old Ursa bridge was very old and built on the honor plan. There was objection to it in the days of autos, since from one end a curve prevented one from seeing the incoming car as it sped from the hill." *Written contribution.*

10508. "In Memphis, Tennessee, years ago a woman was killed and a

tree grew up on that spot just the shape of a woman. And they say they cannot cut it down. At night you can pass that tree and you can see it moving around. Some men tried to cut it down, but every time they hit the tree with an axe, it would holler and groan like a person; and when they cut into it, it will bleed like blood. It is a poplar tree." *Negro*.

10509. "I was sitting reading one night and our little dog started to bark. I looked to see what was wrong with the dog and there was a big dog at the kitchen door with his paws on the door trying to get in. Then the dog went over to the window and put his paws on the window sill trying to get in. About three o'clock that night my husband heard a loud noise in the cellar. He thought maybe it was the man that the dog belong to, cursed me and made me go down in the cellar to see, and I didn't find anything. Then he said, 'Look, there is a man standing in our yard, talking to our neighbor, with yellow corduroy pants and a blue jacket.' With that he picked up a crowbar that was lying in the house and started to go to hit the man. When he got to the spot the man was gone. He turned and said, 'Lena, I will never curse you again. That was a token for me. And the next day he dropped dead right on the spot where the man was standing.'"

10510. "I was sick for a long time. A woman came to see me one day and said, 'I have a charm for you to wear in the shape of a little dog; will bring you good luck.' I put the charm on a string of beads I was wearing around my neck. Several days after that I was lying in bed and that little dog jumped right off my neck and hit me in the face. I sure was scared. I sent for that negro woman and she said that charm was a talking hand and I didn't talk to it. I said, 'After this when you give me something tell me what to do, for that dog jumping off my neck liked to scared me to death.' I started to talking to the charm and got well in a few days."

10511. "My sister and I lived at Eight and Kentucky Street and the house was haunted. One day my sister was wiping dishes and a little brown dog came up right through the floor and stood there. My sister tried to run it off. It would not go. Then she thought she would throw the plate at the dog that she had in her hand. She tried and tried but the plate would not leave her hand. Something just keep the plate in her hand. And the dog just disappeared in the floor just like he came."

10512. "My mother and a whole wagonload of young folks eighty years ago were going to singing school. They passed a cemetery but they did not think anything about it. All at once someone in the

crowd said, 'Why, there is a little black dog riding on the double-tree.' And one of the boys took the black snake whip and hit it. The dog jumped off. They went a little way and someone said, 'O, there is that black dog on the wagon again.' The boys took the black snake whip and hit it again, and the dog jumped off. That black dog done that all the way, jumping on and off, until they got back to the cemetery; then it disappeared in the cemetery. It was someone's spirit riding with them out of the cemetery to singing school."

10513. "My mother rented a house thirty-five years ago, and the man when he rented it said to my mother, 'I will let you have this house because we have always been friends, but I want you to promise me you will lock my dead wife's bedroom, for she told me before she died she didn't want anyone to use it.' So my mother took the house and locked the door. I was working away from home and lost my job so I came home. I was about fourteen years old. I found this bedroom door locked and I said, 'Mother, what is this door locked for' — and she told me the man's wife didn't want anyone in there. I said, 'Mother, I am going to take that for my room.' We had a fuss, and at last mother said, 'If you come screaming out of that room, don't blame me.' I said, 'I am not afraid of ghosts.' So I fixed the room up that day and that night when I went to bed I did leave the lamp burning, even if it was a moonlight night. I was lying there looking at the window and the moon when a white dog jump up on the window. It jump down on the floor, and when it jumped it shook the whole house. It even scared my mother, for she screamed and said, 'What is wrong?' I would not speak to my mother because that would make the ghost leave. But the lamp went out when mother screamed. I was not afraid, I lit the lamp again, and there stood that dead woman at the foot of the bed, looking so mad at me, with her arms folded. I said, 'What in the Name of the Father, Son and Holy Ghost do you want?' Then she told me she didn't want anyone in her room. I told her I had no place to sleep, could I not stay there. Then she said, 'If you will let no one come in the room but you, don't even let them sit down or change their clothes or do anything in the room, I will not bother you; but if you let anyone in this room, beware' — and she disappear. And I never let anyone in, and the ghost never came again."
10514. "About thirteen years ago a man and I started out on a journey and when we got to the edge of some woods this man said, 'You wait. I will be right back.' I sit down on a log. It was getting

dark and I waited a long time and he did not come, so I got up and started down the road. It was so dark I could not see where I was going, so I fall down and went to sleep. Something woke me up, rubbing their cold hands over my face. I looked up and I could see two girls, one standing on each side of me, with long hair. And one of the girls said, 'Will you please move off of our grave. We can't sleep with you lying on it.' I jumped up and beat it. I didn't wait to be told the second time. I was in a graveyard and did not know it. I run until I got to the top of the hill, then I look back and saw the two girls standing there. And I started out again."

10515. "One day when we were living on Seventh Street my mother told me to get two buckets of water. I went out to the cistern in the yard, and just as I went to set the buckets down there was such a noise in the closet, it sounded like all the pots and pans fell down. Then the closet door open and a beautiful girl walked out. I tried to catch her, and just when I thought I had her, she disappear."
10516. "That old haunted house on Seventh Street was a large place and we only lived downstairs. No one was living upstairs. One day my mother was washing clothes. I was just a boy and I was helping her in the back yard hanging up clothes. I looked upstairs and saw a man on the porch. I said to mother, 'I am going up to see what he wants.' I went upstairs and could not find anything. I went through every room and only one closet door was locked. I tried to open it but I could not. Then I went down and got the axe and just when I was starting in the house with the axe, my mother said, 'Put that axe down. I don't want you bringing in a coffin.' So I went without the axe and started to kicking on the door and all at once I turn around and a girl was standing in front of me, all ready for bed. I could not move. Then the girl moved. I did sure move downstairs after that girl got out of my way." *Same informant as in the preceding item.*
10517. "I sure believe in presentiments. Years ago when I was working, one night I was walking home just at dusk with my money. As I was crossing over a little brook, something said, 'Walk fast. Walk fast.' I looked up in the trees and all around but could not see anything. All at once that voice said real loud again, 'Walk fast. Walk fast.' When I got to the gate I looked back and our neighbor was following me with a big club in his hand. If that voice had not of warned me to walk fast like it did, I would have been killed for my money. And I was so good to that old nigger. Always doing something for him."

10518. "I am about to relate an incident that occurred probably in the 1850 decade, perhaps a little earlier. There had been a terrible epidemic of cholera throughout the whole course of which John G., an honest, pious Irishman, had been indefatigable in nursing the sick and burying the dead. He was the very last man to die of cholera in that epidemic. He fell sick after dark on that night of his death. He was alone with his faithful wife who dared not leave him and call the priest. She knew well enough that he was dying. In the midst of her anxiety there came a knock at the door, and when she opened it there stood the priest with the holy vessels in his hands. 'I have been called to come to John G.,' said the priest. But no one except the wife who had not dared to leave his side had known that John G. was ill. John G. died, but not without the sacraments. This is the story as his granddaughter told it to me, and as she received it from her mother, who had it from hers." *Written contribution.*
10519. A man who worked at the Gardiner Governor Works in Quincy was killed about two weeks before his wife gave birth to a child. This baby cried continuously and the mother did not know what to do. Eventually, someone told her to show the infant a picture of his father and also to let the child handle something that had belonged to him. She did so, and the baby's crying spells ceased immediately. Throughout babyhood and early childhood, this child was always trying to get his father's picture, and later when grown he would frequently tell how his father had played with him; nor could he ever be convinced that he had been posthumously born.
10520. "The Burton Cave (*about eighteen miles from Quincy*) is haunted. A man was killed right in front of the cave. You can go there in the daytime and everything is all right, but if you go by there at night something will pull you right into the cave."
10521. "I have known two persons who asserted that they were able to see ghosts. The first was a lady of good standing and fair education, the daughter of a Presbyterian clergyman, wife of a fairly successful merchant, related to the most respected people in town, mother of two sons of perhaps fourteen and sixteen years when she told me this. I have the impression that the two experiences that I am setting down were not the only ones she had. She may even have mentioned others, but these are the only ones I remember. She was a visitor in the family of her fiancé whose dwelling was what we now know as the Commandant's residence at Soldier's Home. She sat with other girls, one of them her future sister-in-law, in the upstairs front chamber which had

been assigned for her use. Through the open door of the room she saw pass down the corridor toward the head of the stairs the figure of a man. He looked in upon her with a fierce angry stare. She sat amazed and silent for a moment, wondering who he was and how he got there, and almost immediately she saw him returning along the well of the stairway. When she realized that he was passing horizontally above the stairs and not descending upon them, she found voice to cry out. He brandished a stick threateningly, frowning upon her all the while, and vanished from her sight. At her outcry the other girls gave the alarm and search was made for the intruder in vain. Long afterward she was told that her description of the man tallied in every detail with that of a man, only son of the builder of the house, who some years before returning at night from town intoxicated as was his habit had fallen into the creek that runs through the grounds of Soldiers' Home just north of Locust Street, and had been found there in the morning, drowned. The second experience she related was of an apparition of the same man. She was now a bride, living in this same house with her husband's family. Her room was on the ground floor in an ell that extends toward the west. You can locate it for yourself if you drive through the grounds. A party of members of the family and callers were gathered in her room. Through the door, which nevertheless did not open, came this man, dark, sullen, and threatening as before. He moved to a small table on which were fruit and cakes, seemed to help himself to a cake, again looked threateningly upon her, and vanished as before. She told me this herself and she was serious about it. I have never heard that that house had the reputation of being haunted, although I know very well a lady who lived there for years, her father being Commandant." *Written contribution.*

10522. "The other ghost seer of my acquaintance was a pleasant old German woman, mother of the one-time sheriff P., and mother-in-law of a lady who was for several years our housekeeper, Mrs. M. by name. Knowing my delight in ghost stories, Mrs. M. introduced me to her mother-in-law. Yes, said Mrs. P., she had been seeing ghosts ever since she was ten years old, though she had seen none lately. There were no ghosts about that place where she was then living (*the courthouse*). She told me about quite a number of apparitions, most of which I remember but vaguely. One ghost she saw on moving into a new residence. It was a bright moonlight night, and stepping without a lamp into a room in an ell she saw through the curtainless window a young

man, red-headed, blue-eyed, pale, peering into the room. He moved above the ground not on it, and so she knew him for a ghost. She learned afterward that the house had many years before had an evil name and that a young Irishman had once disappeared from the place and never afterward been heard from." *Written contribution.*

10523. "Her husband at one time conducted a saloon on South Fifth Street just opposite the old Franklin School. The ghost of a woman haunted this place and Mrs. M. often met her in the corridor. The house burned down one night. The family had scant time to remove themselves with but few of their belongings. From the sidewalk across the street Mrs. M. saw the roof fall in, and just before it fell she saw her ghostly lodger standing at the window gazing apparently at the crowd below. A year later the husband had again established a saloon on the corner of Fifth and York, the same close neighborhood. A man from the country came in for refreshment and spoke to the proprietor about the frightful misfortune that had overtaken him the year before. The saloon keeper said that the misfortune had not been so terrible, his new venture had prospered and except for a passing inconvenience he had nothing to complain of. 'But your wife,' said the man, 'You lost your wife in the fire!' The saloon keeper said that his wife was alive and well at that moment. She had come to no harm in the fire. 'Who was the woman then that was killed in the fire?' asked the man. 'No one was killed in the fire,' insisted the saloon keeper. 'But I swear to you,' said the man, 'That with my own eyes I saw the roof fall in upon a woman who was standing at an upper window! Who was that woman?'" *Written contribution.*

10524. "Seventy years ago a couple came and built a cabin (*log cabin*) on Mill Creek and lived there awhile. The man chopped wood. Then one day this man died and they buried him right close to the cabin. His wife and the dog stayed in the cabin and worked around the neighbors. One morning she did not show up to work. Someone came along the next day and saw the dog dead with his head all mashed in. They could not find the woman. But after that every moonlight night they would see this woman come from the woods and walk around this cabin, then go back to the spot where she came from and disappear in the ground. Then an old negro couple came along and wanted to rent the place. The neighbors told him the place was haunted. He didn't care. So he and his wife saw the ghost every moonlight night. She would still come from the woods and walk around the house

and go back. This old negro one night thought he would follow the ghost. He did, and the ghost disappeared right in the ground in front of him. This negro started to digging right where the ghost went down, and he found the body of that woman that had lived in that house. They could tell her by her hair. They took this body of bones and put them in a box and buried it. And the ghost never walked again."

10525. Concerning a well-known house in Quincy: "Years ago a rich southerner built that place. When he died it is said that a cousin put a live bee in his mouth and took his hand and made him to sign his name to the will, so the cousin could say he had life in him when he signed the will. The will left everything to the cousin and nothing to the rightful heir. It is told that for years the old man with long white hair would come back every night and wander through the rooms upstairs and unlock the doors and sit by the fireplace. And everyone that has lived in that house since Mr. T. died has parted (*husband and wife have separated*) and lost all their money up to right now."

10526. A well-known haunted house in Quincy was that of an Indian doctor which formerly stood on Twelfth Street between Vermont and Broadway, where the Indian had killed his white wife and then himself. After this tragedy no one ever lived in the house and it soon fell into ruins, ruins which were started and facilitated by boys throwing stones through the windows. There were the usual bloodstain, mysterious noises and lights. Some believed, in spite of the coroner's verdict, that the Indian had never died, his coffin having been filled with stones and buried; others thought a mock burial had taken place, the live Indian having been buried but later secretly exhumed. This latter theme, that of mock burial, is also the subject of another death in Quincy, but for various reasons cannot be described here.

10527. "An old woman was sick in bed. She always would knit all the socks and stockings for everyone in the family. She was worrying because she did not have them done and was sick. While she was lying in bed, a beautiful white horse came down the steps and came to her bed and put its nose in her hand and said, 'I have come for you.' The old woman said, 'O, don't take me now. I am not ready. Wait until I get all the stockings and socks knit for the family.' The horse said, 'I will come back for you.' The old woman got well, and started to knitting, and the nearer she got done the more she would worry about that white horse. She was all done but one sock. She started on it, then laid it up on the table and said, 'I will not finish it because I

don't want to die.' But she died that week." — *From an old Irishman in his eighties, who said the story is ninety years old.*

10528. "About forty-eight years ago a man was dying and just before he died he wanted his wife to promise, on the ninth day after he was buried she would come to the cemetery; he said he would talk to her. She would not promise, but on the ninth day she went and stood at the window; you could see the cemetery from their house. She said she saw something walking around and around his grave. She didn't know if it was him or not, for she was afraid to go and see."
10529. "The first dike up the river on the Illinois side, once a month on a moonlight night a man will come from the bank and walk to the end of the dike, then disappear in the water. I have seen this myself several times, but could not find out what it was or why he did it."
10530. "Years ago up on an island right above the bay there was a family murdered, and on a moonlight night, hunters when they are in their cabins can see the man, woman and girl walking around through the bushes. Their faces are all cut and bloody. When the hunters go to where they are walking, they disappear."
10531. "A woman and her husband did not get along. This woman killed herself and left a little baby six months old. The woman would come back every night. You could hear her run up the walk and open the front door. Then you would not hear anything until the next night. My brother was staying there and he heard the woman every night. About a month after this woman was dead, this baby was sick and was sitting on its grandma's lap. It looked up to the ceiling and said, 'Mama.' And the child had never talked before. And the baby died that night. And the woman never walked up the walk again. She was just coming back after her baby, and when she got it, that was all she wanted."
10532. "About fifty years ago a school teacher, that lived on the south side of Vermont Street between Eighth and Ninth, went back on her beau; and one morning while she was sitting by the window, putting on her shoes and combing her hair, the beau came and shot her. Every morning after that you could see that girl sitting at the window in the morning, combing her hair. I used to take care of some horses that were in the alley in a big barn, and every morning when I went to take care of the horses, I would see her myself, sitting there. No one would stay in the house and they had to take it down."

10533. "About fifty years ago we were living at Thirtieth and Broadway in a double house. An old woman that lived on the other side went out to milk her cow one morning and came in the house and laid down and died. My mother found her. We had a grapevine over the back porch and a cistern on that back porch. My mother and this woman would always wash out there. We children took the diphtheria three months after this woman was dead and my mother got up one morning at two o'clock to go to the cistern to get us some fresh water, and when my mother got to the cistern, she met this woman standing there. My mother said, 'Why, Mrs. N. I thought you were dead' — she was so real. And the ghost said, 'I am dead, but came back to wash my clothes' — then disappear in the grapevine. We moved as soon as we got well."
10534. "Years ago out on Honey Creek about one mile northeast of Mendon there was a farmhouse out in the woods. A man lived there that had ten children. He buried five of them in the yard. And after that family left, everyone that would move into that house could not stay. They would be sitting in the room and a big black cat would come in the door and come and jump on your lap, then go to the stairs and disappear. My uncle thought he would go and live in the place. The first night, he was smoking his pipe, this black cat came and jumped on his lap. He said he thought it was a cat. It was so real that he started to pet it. And it jump down and went to the stairs and disappear. And he didn't live there long. He got out. They took the old house down."
10535. "Up here on Rock Creek (*near Ursa*) there is a place where there is five graves, four white, and one old colored woman that would be over a hundred if she was living. A man and his wife came out of Quincy last summer to Rock Creek to pick up some rocks (*for a rock garden*) and while they were picking them up, they got close to these graves, and they saw an old woman with a long black dress on to the ground and a sunbonnet on with a black veil over the sunbonnet. She was just walking around the creek. This man and his wife were not afraid, but they left. They talked about it all the way home and said they would go back again. They were not afraid. So in about a week they went to this same place again and put their car up near the place (*of the graves*), and not seeing anything, started to picking up rocks again; when one of them happen to look up and saw this time the old woman was all dressed in white, with white sunbonnet and white veil. This time she was not walking. She was flying

He went over and looked into her sunbonnet and said, 'What are you doing out this time of the night?' And he found out she did not have her head on. She started to running him and ran him all the way home. He fell in the door and his mother said, 'What is wrong with you? I told you that the devil would bring you home some night.' He said, 'It was not the devil. It was Nancy's spirit running me home, because I looked into her face'."
10537. "We had a woman to die in Quincy several months ago and after she was gone about two weeks they heard someone knock on the front door. Her son went to the door and open it and there stood his mother. It scared him so he holler, 'It's ma' — and she disappeared."
10538. "A woman was very extravagant with thread. She was always throwing it away. One day this woman got sick and she said to her mother, 'O, look, there is the devil.' Her mother looked but said she did not see him. The woman said, 'O, there he is at the foot of the bed, holding up a large spool of thread.' And the devil said to this woman, 'See this thread? As many threads as are on this spool, just that many days you will serve in hell with me.' It was a token. She died that night."
10539. "One time a lady woke in the middle of the night and looking toward the foot of the bed she saw a man in a blue shirt and dark pants. She was almost scared stiff with fright. She tried to call her husband but could not speak. Finally she gave such a punch that he groaned and the man faded. The next day when she went to the store she told the grocerman what happened. He told her that the next time it happened, to say to it, 'What in the Name of the Lord do you want?' And if it just mumbles and don't say anything, to say, 'What in the name of the devil do you want?' Because Satan might be wanting to warn you of something that is going to happen."
10540. "I fancy you will think worth recording what Mrs. M. told me, in connection I think but am not quite sure, with the very ghost mentioned here. Mrs. M. being in the habit of meeting a very pathetic and appealing apparition, mentioned it to her confessor. He said that this was plainly one that had almost passed through its purgatorial period and that it wished to communicate some

message that weighed heavily upon it. He advised Mrs. M. to speak to it and give it the opportunity to unburden itself. But Mrs. M. never did so. She was not at all afraid of these apparitions but she had never spoken to one, and could not bring herself to do so. You understand of course that ghosts cannot speak unless spoken to." *Written contribution.*

10541. This old negress when a girl, sixty-five years ago, worked for a white family in Monroe City, Missouri. The room in which she slept was haunted. Each night during the three years she remained with this family, the closet door of her bedroom would open and a woman — dressed in white, having large blue eyes and arms folded on her breast — would appear, walk over to the bed and then fade away. "I didn't know her name. If I had, I would of asked her what she wanted, for ghosts will always tell you if you call them by name. After the three years I got married. Another negro girl by the name of Anna went to work and they put her in that room. She only stayed one night, for when that closet door opened and that woman come walking over to the bed, that negro raised the whole town of Monroe City. She was sure afraid. I was not."

After that everyone said the house was haunted. I didn't care. I moved into the house. I was sleeping in the front room and my son was in the room back of me. I could always hear knock-

ing on the door and my bed, but I did not care. Every night this woman come and stand by my son's bed and look at him, then walk around the bed and then disappear through the window. My son always slept with a revolver under his pillow. This spirit came one night and pulled the revolver from under my son's pillow and throw the gun down on his feet. Then I did get afraid. I thought maybe this ghost would kill him some night. I got the Bible and read the ninety-first Psalm and prayed, and made him sleep with the Bible under his head. And the spirit did not bother him any more. I went and moved my bed out of the front room into the dining room. Someone said, 'That room is haunted too.' But I was not afraid. Only, I saw the spirit one time and the man (*who killed his wife*) came to my bed one night. He was tall. His hands were cold and his finger-nails long. I could just feel them sticking in my side. He was trying to lift me out of bed. This spirit got me to the edge of the bed, then disappeared. Then I got up and read the ninety-first Psalm and put the Bible under my head. I was walking and when it got dark I stopped in an empty house, thinking I would stay all night and walk on to my aunt's house as soon as it got light in the morning. The house did not have any door and all the windows were broken out. I was afraid of snakes, because I didn't have any whiskey along. I was tired out, so I lay down on the floor by the open door with my coat under my head for a pillow. I don't know how long I was asleep, but something woke me up and a man was standing over me. I asked the man what he wanted. He did not say a word, only looked at me. I thought it was time to go when he did not speak. If I had of had a Bible to put under my left arm he would of talked to me, for spirits will always talk to you if you have a Bible under your left arm and ask them, 'What in the Name of the Father, Son and Holy Ghost do you want back here?' So I started out the door and step on something. It sounded like a cat howling. It just kept howling and following me down the road. I don't know if it was a cat or the old man's spirit turn into a cat. I never stopped to see. I just kept going and got to my aunt's house in the morning all in."

One time we were living in a haunted house, and after we went to bed, you could see people come in the window. They would walk all over our bed, even take the cover off. And his hand slipped right off when I got to the four corners."

The negroes told him that a very bad negro had died, and they had some of his old gray hair they had taken off his head after he died and they had bound and socked it into that hole, and if anyone would pull that plug out of that tree, his spirit would float around and he would bewitch everyone that he met."

The person that lived there would tie up his horses and cows and the next morning they would all be out of the barn, until someone told him about hanging a sack of salt over each head.
